

Pitching Instructions – Windbreak

- Assemble the 5 steel uprights from the sections provided.
- Each pole should have a short pin at the bottom & a long pin at the top (To tie the guyrope to)
- Insert the poles into the sleeves of the windbreak & secure with rings provided.
- Starting at one end of the windbreak attach 2 guropes to the top of the pole & peg out at around 90 deg from each other. (As diagram Below)
- Now move to the other end of the wind break & again use 2 guyropes at 90 deg. (As Diagrams below)
- Tension the windbreak further by pegging out the 3 remaining uprights. (As Diagram below)

Warning

The windbreak is not designed for Very High wind speeds or Very Exposed campsites.
